## MEDIPING

FREELANCING

<https://medi-ping.netlify.app/> [Github Repo](#)

MediPing is an Online Communication Platform built specifically for the Medical Domain. It is very similar to Slack and has all the same functionalities. MediPing is your Digital HQ—a place where work flows between your people, systems, partners and customers.

React.js MongoDB TailwindCSS REST APIs

## CYBERML

FREELANCING

[Github Repo](#)

Two-factor authentication has been the university standard for securing user authentication all around the world. But with the advent of better technology with a rapid pace, 2FA has started to fail in some use-cases and these scenarios are occurring more often. The aim of this research is proposing a novel approach that involves adding a 3rd layer of protection provided by Machine learning to verify the integrity of user requests on a website in between the process of submitting the user credentials and entering the One-time Password that the user receives as a feature of 2FA.

Python Flask scikit-learn Jupyter

## MOVIE FORECASTING

GIFT UNIVERSITY - CAPSTONE

A web application that predicts the success of a movie based on the Box-office earnings metric. The app takes in the movie cast, genre, director and predicts the estimated box-office earnings of that particular movie.

HTML CSS Bootstrap JavaScript MongoDB Bootstrap Python

## LIBRARY MANAGEMENT SYSTEM

GIFT UNIVERSITY

A web application for maintaining the record of a library.vlt covers the basic CRUD operations i.e., the number of books available in the library, the number of books issued, returning or renewing a book, calculating the fine if a book is returned after the due date. Major focus was on applying OOP on the system.
